

Our Mission is to provide High quality steel products

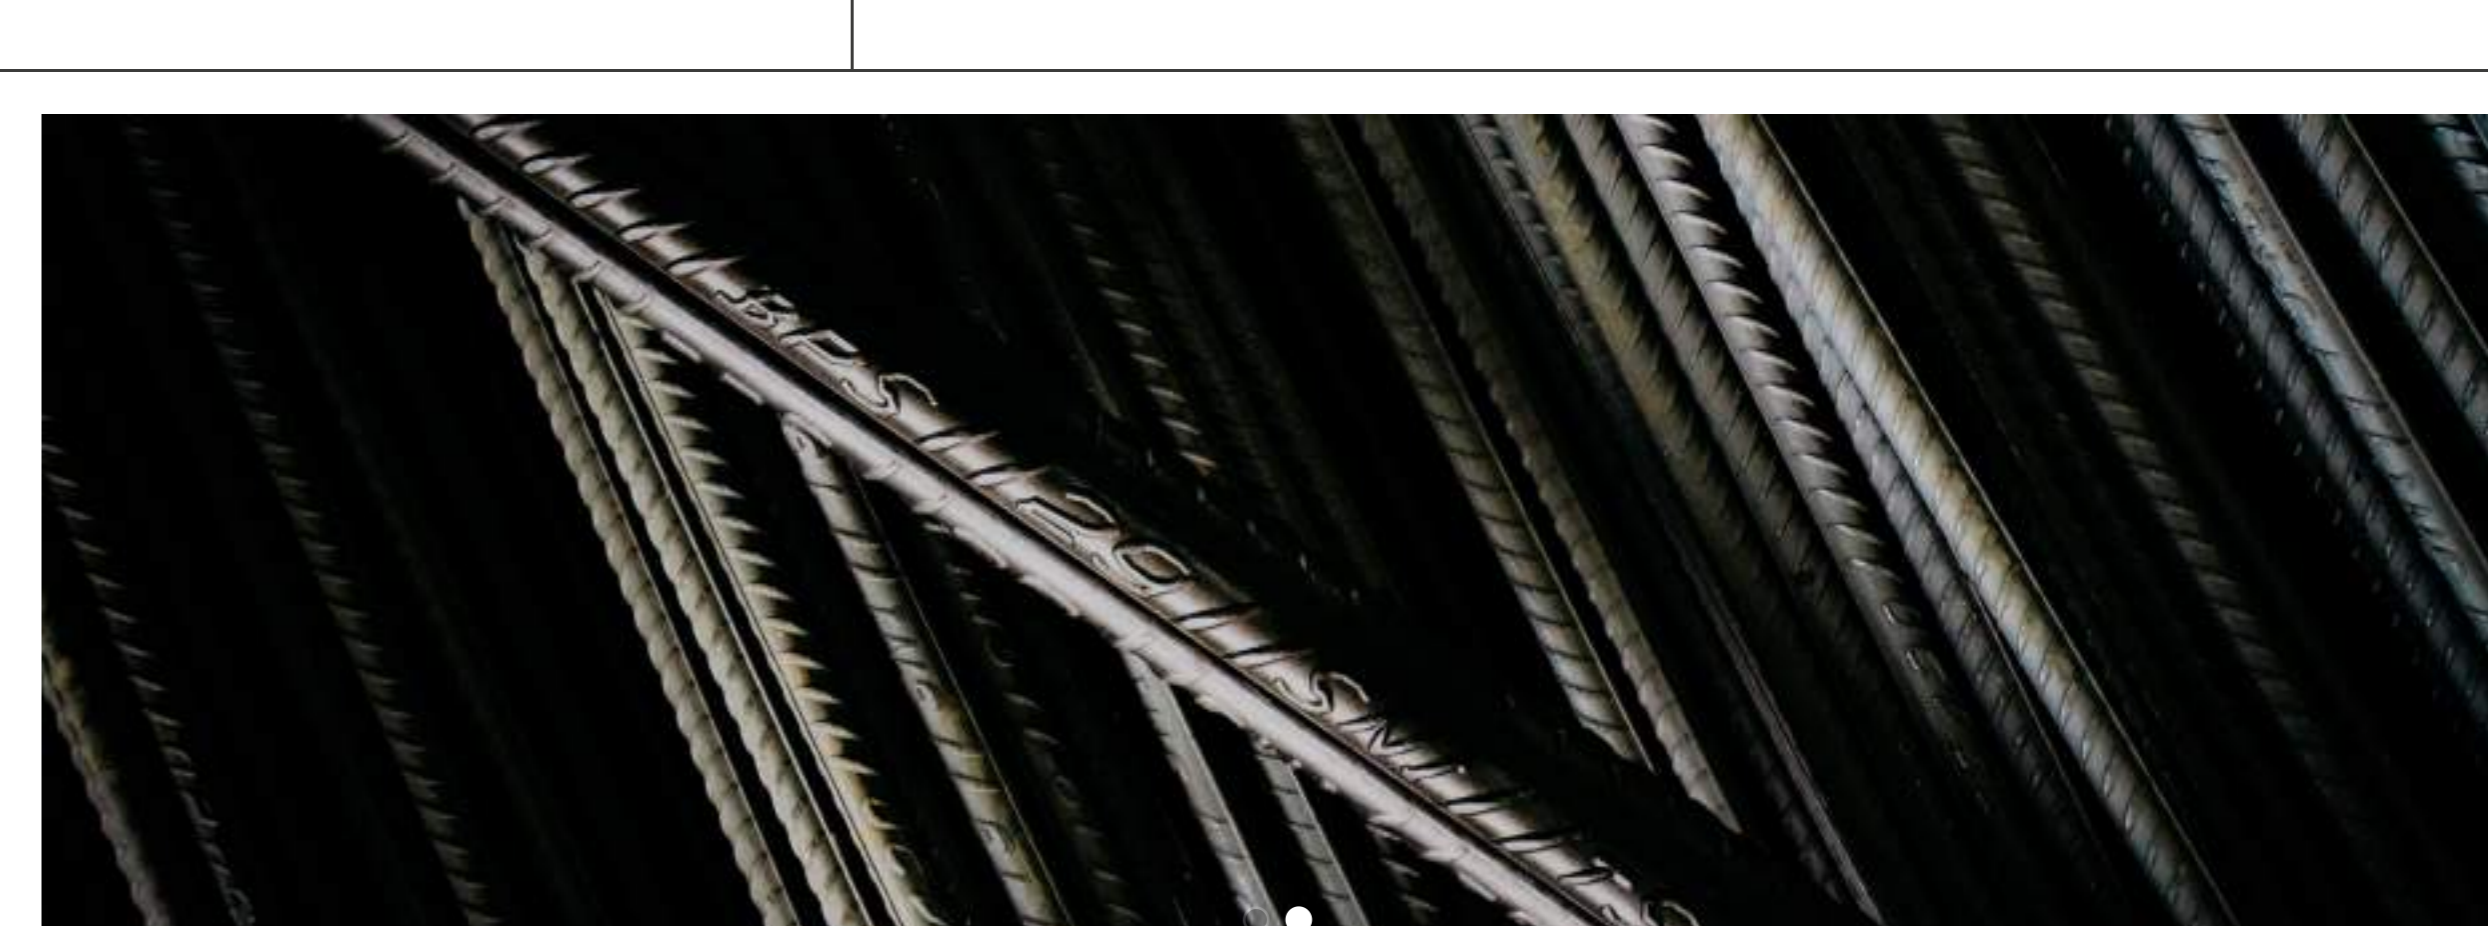

We are a steel mill that focuses on manufacturing reliable reinforced bars for buildings and constructions.

MORE ABOUT US

We offer a wide range of product size and grade.

Quality Products

ALL PRODUCTS

Our Products are 100% certified SNI and TKDN

SEE OUR CERTIFICATION

Delivering iconic projects in partnership with our clients.

OUR CLIENTS

Our Projects

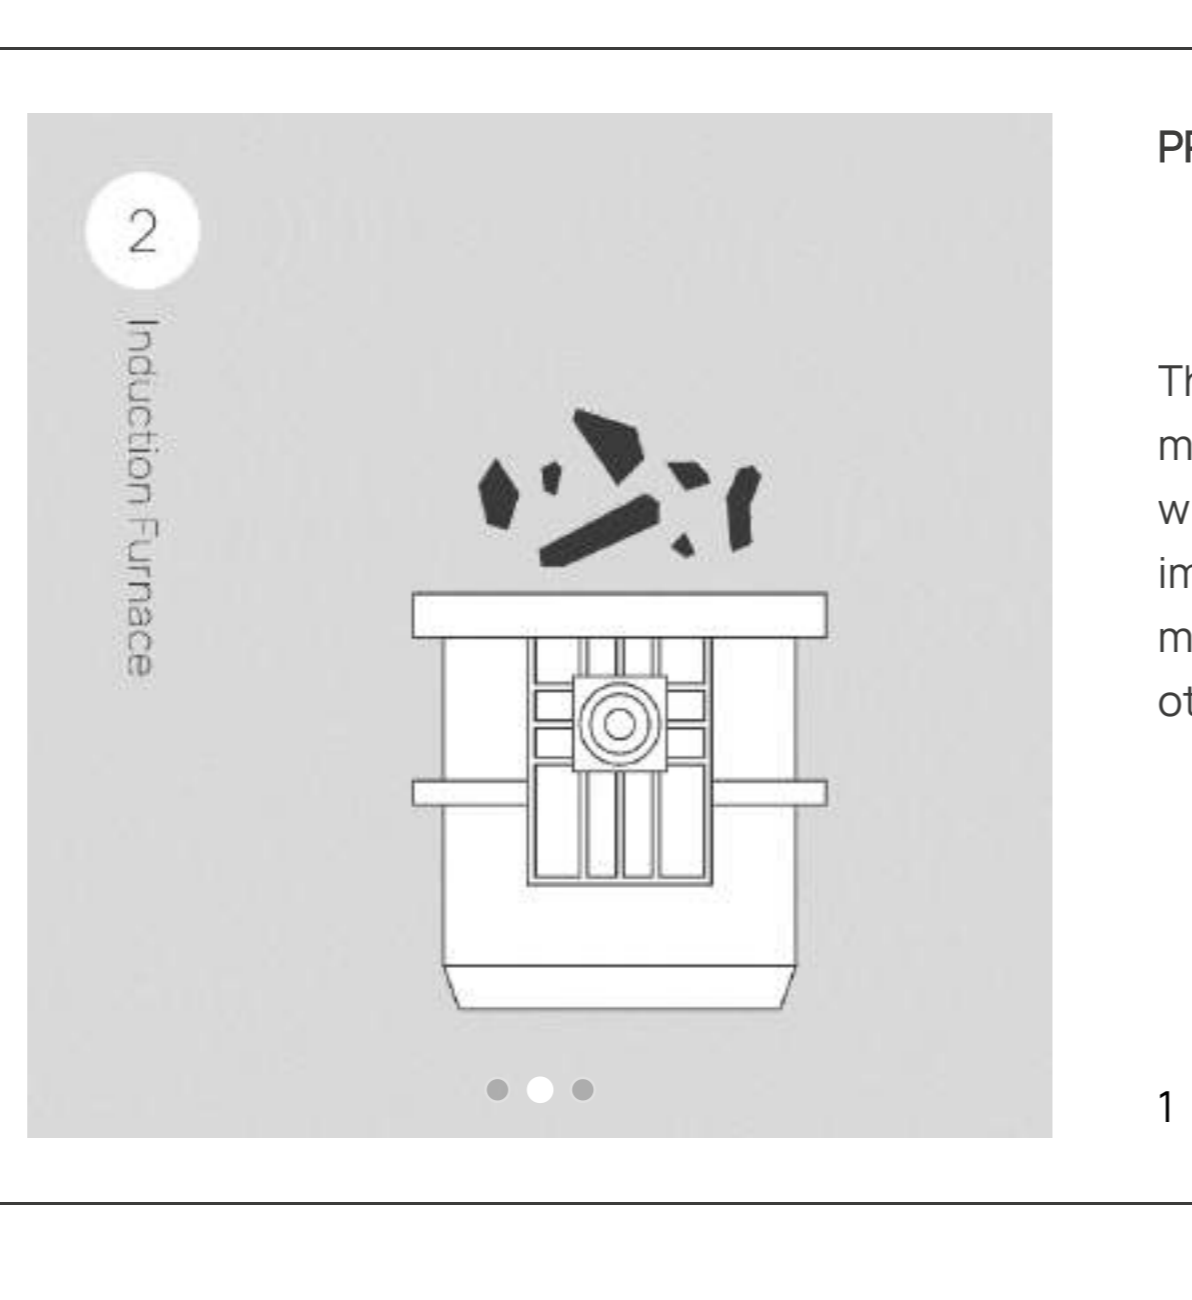

Prioritize the integrity and longevity of the residential projects with the trusted reinforced steel—a crucial material that underpins the strength and durability of residential projects.

2

Induction Furnace

PRODUCTION PROCESS 2

The induction furnace process for reinforced steel making involves melting scrap steel using electromagnetic induction. In this method, an electric current is passed through a coil surrounding the furnace, generating a magnetic field that induces currents within the scrap metal, producing heat. This heat melts the steel, allowing for precise temperature control and the removal of impurities. Once the steel reaches the desired molten state, alloying elements are added to achieve the required properties. The molten steel is then poured into molds to solidify, creating reinforced steel with consistent quality and strength for construction and other applications.

FACILITIES

Here at BPS, we provide facilities for staffs and workers to spend leisure time.

Get In Touch

We'd love to hear from you! Whether you have questions, feedback, or need assistance, feel free to reach out to us. You can contact us from the contact list below. Your satisfaction is our priority, and we look forward to connecting with you!

OUR LOCATION

Here we include our address below to making it easy for you to visit us. Our office is open Monday through Saturday. For directions or additional information, please don't hesitate to contact us.
