DEPARTMENT OF BIOTECHNOLOGY

Home > Faculty of Sciences > Department of Biotechnology

OVERVIEW

Our Department provides an advanced understanding of modern life sciences through the development of integrated knowledge, bringing together several disciplines, and offering a rich intellectual atmosphere. With the use of the latest biotech tools and techniques, the visionary and dynamic contributions of both teachers and students, and meeting the ever-growing international needs, this department is contributing to global value addition in laying the foundations on which the natural and material world depends.
