About Us

Trusted Partner in Feed and Grain Technology

Founded in 2008 Frontec group started its business through Frontec Agritama Engineering (FAE) to manufacturing material handling products such as bucket elevator, chain conveyor, screw conveyor and grader cleaner.

Frontec keeps on developing its engineering technology and widen its products. Frontec also produces corn dryer with several options of burner depending on the most efficient resources near the plant. It manufactures several feed mill machineries as well, such as hammer mill, mixer & dust collector.

In order to fulfill the need of the feed and grain industry Frontec group sets up a new company, which Frontec Global Niagatama (FGN) providing material handling spare parts such as hdpe and steel bucket, forged chain link. Frontec has been appointed by Zhenjiang Sanwey Conveying Equipment Co., Ltd. as an exclusive distributor for its conveying spare parts in Indonesia.

Frontec also supplies complete storage solution since Frontec is appointed by world class silo manufacturer Altuntas group from Turkey as an exclusive distributor of grain silo for Indonesia market.

Why Frontec?

Frontec's goals is to providing quality engineering solutions that beyond it's customers expectations.

Frontec providers wide range product and services. from engineering design and consultancy to manufacturing equipments and project erection or installation.

Frontec has very professional human capital in order to deliver it's products and services.
